

Public Works Monthly Report December 2017

Emphasis this month was on the following:

Highway Division:

- **Winter Operations** – During the month there were three winter events that we brined all township roadways in advance of the winter storms. During these operations we applied approximately 30,000 gallons of salt brine to prepare for the storms. During each of the snow events we applied approximately 825 tons of rock salt and 3,400 gallons of salt brine.
- **Winter Equipment Maintenance - Equipment** maintenance was an important facet of our daily operations during the month. During this period we spent numerous hours readying and maintaining plows, spreaders and brine equipment.
- **Street Sign Upgrades** – Township staff continues to replace and repair existing street signs and regulatory signs on many Township roadways. This task is ongoing to bring signage in compliance with new state and federal reflectivity standards. Most regulatory signs are being upgraded on all newly resurfaced roadways. Township staff is tree trimming around many street signs throughout the Township (see attached)
- **Street Sweeping** - Street Sweeping operations are shut down from December through February and normally begin the last week in March weather permitting.
- **Olson House Renovations** – Township staff completed needed repairs and modifications to the building in anticipation of our new tenant occupying the building during the month. (see attached)

Parks Division:

- **Parks Maintenance** – Township Park Staff continues to maintain and make repairs to Township active parks equipment as needed. Staff is servicing and making mechanical repairs of parks equipment in preparation of spring use. Staff also assists with all winter operations (see attached)

Building Maintenance Division:

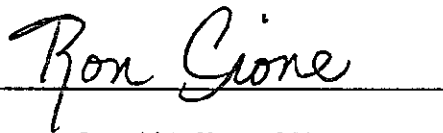

- **Buildings Maintenance** – All Township buildings were maintained as scheduled and as needed. (See attached)
- **Olson House Renovations** – Township staff are supplementing the work done by outside contractors by performing work on both the interior and exterior of the Olson House. (see attached)
- **Administration Bldg Repairs** – Township staff with outside contractors are making modifications to meeting room B as budgeted.(see attached)

Sewer Division:

- **Pump Station Maintenance** – Township staff maintained all seven Township owned sewer pump stations as needed. (see attached)
- **Butler Pike Station Repairs** - During the month of October, the pump station had two of its pumps go down requiring emergency after hour repairs to be made. Township staff finished making permanent repairs to the station.
- **Sewer Maintenance** –Staff assisted in installing the new electrical service to the WRA clubhouse. Staff is to preparing for the 2018 road resurfacing project. This work includes sewer line inspection, televising, and manhole restoration. Township staff assisted other Township staff in the renovations of the Olson House Project. Staff continues to meet with PennDOT regarding the relocation of sanitary sewers in conjunction with the 202-widening project. (see attached)

Equipment Maintenance:

- All Township equipment and vehicles were maintained as needed. (see attached)
