Municipal Projects

Village Circle Detention Basin Retrofit Project – Whitpain Township recently retrofitted a thirty-five year old detention basin from a dry bottom basin to a naturalized basin. The basin is located in the Village Circle development. The basin was outfitted with new, innovative storm water management controls which included a sediment forebay, infiltration pits, grading & flowpath modifications, a new outlet control structure, landscaping and associated downstream drainage channel improvements. The project was completed in October 2016.

Narcissa Road Trail Improvements – In 2016 and 2017, Whitpain Township plans on installing several trail extensions to the Narcissa Road trail (Wings trail). Trail extensions will occur along Norristown Road (sidewalk improvements), Stenton Avenue (Village of Oxford connector), within Prophecy Creek Park and adjacent to the Blue Bell Woods community. Most of the improvements should be in place by the end of 2017.

Maple Avenue Sidewalk Improvements Project – Whitpain Township, through a \$250,000 PA Department of Economic Development grant, has initiated a municipal improvement project to install new concrete curbs and sidewalk on Maple Avenue between Oak Street and Mount Pleasant Avenue in the West Ambler section of the Township. The project is part of the improvements identified by the West Ambler Revitalization Study. Approximately, 1,800 linear feet of concrete curb and 6,800 square feet of sidewalk were installed as part of phase I of the project. In addition, the project incorporated new curb ramps and necessitated driveway and grade adjustments. Phase II of the project will include the installation of new sidewalk and concrete curb on Mount Pleasant Avenue between Railroad Avenue and Maple Avenue and on Oak Street between Railroad Avenue and Maple Avenue. Phase II of the project is under construction and it is scheduled to be completed in October 2017. Phase I of the project was completed in October 2013.

Centre Square Park Project (Cook Tract) – Whitpain Township through a public-private partnership with Walsh Construction will be constructing a new athletic facility that includes seven soccer fields, walking trails and a dog park on a 98 acre parcel located at 1527 Yost Road. The park will have its main access from Yost Road with a secondary exit to DeKalb Pike. The estimated \$4.5 million project includes parking, utilities and stormwater management. The innovative stormwater management system includes bio-retention swales, infiltration basins and rainwater harvesting cisterns. The rainwater harvesting cisterns supply the irrigation system with recycled storm water to irrigate the seven soccer fields. The paved/stone dust walking trail will extend to over a mile in length and a second wood chip walking trail will extend to the central branch of the Stony Creek located on the western boundary of the site. The park improvements were completed in the fall of 2014 and the park trails were opened to the public in early 2015. The athletic fields were opened for use in September 2015.

Traffic Improvements

Pedestrian Improvements at the Intersection of Walton Road, Norristown Road and Township Line Road (5 Points Intersection) – In 2018, Whitpain Township plans on installing pedestrian improvements at the intersection of Walton Road, Norristown Road and Township Line Road (5 Points Intersection). The project will remove existing impediments to pedestrian movements since the intersection is currently signed with “No Pedestrian” signage. With two SEPTA bus stops, a church/school and several office campuses located immediately adjacent the intersection, there is

sufficient demand for safe and efficient pedestrian access at the signalized intersection. In addition, the new pedestrian crossings will allow access, via existing sidewalks, to the Township trail system (Narcissa Road Trail). The Township received a \$108,000 grant through the MontCo 2040 Implementation Grant program for the project. It is anticipated that the improvements will be constructed in the spring of 2018.

Skippack Pike and North Wales Road Intersection Improvement Project - The Township project includes the installation of dedicated left turn lanes on North Wales Road and Skippack Pike. In addition, the project included traffic signal upgrades, new crosswalks, handicap accessible curb ramps and storm water drainage improvements. Construction began in the summer of 2015 and the intersection work was completed by November 2015.

PA Turnpike Widening Project – The Pennsylvania Turnpike Northeast Extension was widened from milepost A20 to A26, approximately 5.3 miles. The widening includes the construction of three 12 ft. lanes in both the northbound and southbound directions. In addition, the roadway has a 26 ft. wide median and 12 ft. shoulders. Noise walls were installed along residential areas throughout the project. The project began in March 2011 and was completed in November 2014.

Route 202 Widening Project - Section 600 of this project extends from Johnson Highway to Montgomeryville. Although this project is being designed by PennDOT, the design efforts are being coordinated with Township staff. This project involves creation of two travel lanes in each direction with a center turning lane and intersection improvements. The final design and right-of-way acquisition is currently in progress. According to the most recent schedule update, construction is projected to commence in 2018.

In addition to work on Route 202, PennDOT has identified certain intersections that will be improved during the initial phase of the main project to alleviate construction delays. These intersections include Arch Street and Township Line Road and the intersection of North Wales and Township Line Roads. At the intersection of Arch Street and Township Line Road, all four approaches will have separate left turn lanes, and a separate right turn lane will be added from eastbound Township Line Road onto Arch Street. The remaining improvements at North Wales and Township Line Roads involve the creation of separate left turning lanes from Township Line Road onto North Wales Road. These off line intersection improvements are scheduled to begin construction in November 2017.
