PHYSICAL DESCRIPTION:

This house was built in the Bungalow tradition with two additions. The core is a 1.5 story, three bay house clad in dark colored stucco with a one-story wrap-around porch. There is a window in the front gable and a double window in the right bay on the first floor. Frames around the door and windows have a simple profile. The door has a series of glass panes rather than panels. The standard porch rests on columns composed of a stone base supporting short square columns. The exposed rafters on the porch are partially hidden by the gutter. A wood railing connects the stone column bases to help enclose the porch. An addition to the side of the house is a one-story element with smaller windows. It is clad in stucco of a light brown color and possibly replaces a portion of the original wrap-around porch. A second addition was the construction of monitor dormers to enlarge the second floor. The rafter ends of the roof are exposed over the monitor dormers, reflecting the original style of the house.

Classification: Although recognized as a contributing resource in the Center Square Historic District (determined eligible for the National Register), this resource is individually ineligible for Class I and thus is a Class II resource.
