PHYSICAL DESCRIPTION:

This large church complex consists of the church, constructed in 1774, the Parsonage, the Sexton's House, and a barn. The church also includes a large classroom extension to the north, and an addition is currently being added to the north side of the church.

Church

The exterior of the church has been somewhat influenced by the Mission style. It consists of a large, stucco-clad end wall with curved parapet. Atop the front end gabled roof is a cupola holding the bell. Overall the walls are stucco over brick or stone. Windows are large, vertical arrangements with pedimented lintels. There are three across the front end, and three along the sides. (Unfortunately, a new extension added to the north side of the church covers these windows.) The windows have stained glass. The main entrance is located at a level below the windows, and is protected by a pedimented entrance extending approximately 1' from the wall. The building measures 30' x 45'.

Attached to the church, on the north side, is a large, 2-story church school extension. Unlike the addition that is currently being added, however, the extension is set back from the north wall of the church and thus does not alter the appearance of the church.

Associated Resources: (1) Parsonage The Parsonage is a 2.5-story, Queen Anne style house with a cross gable roof. The roof, clad in asphalt shingles, consists of both gable and gambrel design. The gambrel shape faces Skippack Pike. One significant feature is the fascia board and modillion course decorating the eaves around the entire house. This is typical of the Queen Anne style. The frame house is clad in vinyl siding with decorative wood shingles under the gable ends at the third floor level. The foundation is fieldstone. A pent roof with extended pedimented porch over the door is attached to the front of the house. The house is 4-bay wide with 1x1 plate glass sash windows. There are also twin windows under the gambrel end at the third floor level.

(2) Barn The barn is located behind the parsonage. It is a two story, frame building clad in vertical board cladding. A small, 1-story, shed addition is located on the rear of the barn. The roof is end gabled and asphalt shingled. A single window with a pedimented surround is located under the gable. The barn measures 35' x 20'.

(3) Sexton House The Sexton House is a 3-bay wide, two story, vernacular farmhouse with rear shed addition. The house has an end gabled, asphalt shingle roof and a small brick exposed chimney on the north end. The walls are stucco. There is a pent roof on the front façade. Fenestration consists of a symmetrical shaped window arrangement with a centered door under the pent. Windows are 1x1. Characteristic of many houses in the Township, there are twin-angled windows under the gable at the attic level. The core measures 30' x 18'. There is a 2-story addition, also clad in stucco, attached to the rear of the house. Overall, the house measures 30'x 30'.

Classification: Although the associated resources may be considered Class II, together, with the Church and grounds, this is a Class I resource.
